

# WaterWise Fall Brown Bag Workshop Series

## An Introduction to Composting

Bring your lunch and discover ways to use your kitchen scraps to create a healthy garden. WaterWise Brown Bag workshops offer abbreviated educational programs designed to fit into your lunch hour. This free workshop will discuss the benefits and uses of composting, types of composting, and how to use these techniques to naturally increase production and yield in your landscape.

### Topics covered will include:

- "How tos" of composting
- Tips for setting up and maintaining a compost bin or pile
- Troubleshooting common problems

### About the Speaker

Kristy Woodard is a Water Education Coordinator with the City of Frisco. She earned her Master's degree in Environmental Science with the University of North Texas in 2013. While there, she taught undergraduate laboratory courses in Environmental Science and conducted research focusing on the use of plants to filter pharmaceuticals from our drinking water supply.
